

Random Number Generator Certificate

Operator: K365 Web Assets Pvt Ltd
Operator URL: <http://www.khelo365.com>

This is to certify that InfySec has evaluated the Random Number Generator (RNG) used by K365 Web Assets Pvt Ltd and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

InfySec has evaluated card shuffling for single deck games (without joker). The card shuffle tests were conducted on large enough samples to give the calculations sufficient statistical power.

InfySec has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

* The RNG was tested according to Isle of Man Gambling Supervision Commission, UK Gambling commission and Malta standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, InfySec has conducted a level of testing appropriate for a component test of this type.
